

Enhance Your Language Services with Bilingual Fluency Testing

AMN Healthcare Language Services has partnered with Alta Language Services to offer healthcare providers an opportunity to enable a multilingual workforce using a respected language testing platform. Testing clinical bilingual fluency will credential clinical staff who pass the assessment to provide care in two (or more) languages.

This solution marries clinical expertise, cultural humility, and language access to build trust through effective communication in healthcare to achieve health equity.

Staff Credentialing Powered by Language Assessments

We can help you meet the requirements of Section 1557 of the Affordable Care Act by validating the clinical proficiency of staff in another language using our assessments. While this assessment does not provide medical interpreter certification to your staff, this language fluency credential does provide your organization Section 1557 compliance to render care in multiple languages.

Language Assessments Made Easy

Our language assessment is easily accessible via AMN Language Services Single Sign On. This online test can be completed in under 30 minutes and supports 35 languages.

Learn more about how your organization can equip internal team members with the confidence and credentialing to communicate in their language.

OUR ASSESSMENTS WILL HELP YOU:

IMPROVE PATIENT CARE AND SATISFACTION

INCREASE PROVIDER AND CLINICIAN PRODUCTIVITY

REDUCE MEDICAL RISK AND ERRORS

INCREASE PATIENT COUNT AND REVENUE
